Development of SARS-CoV-2 Inhibitors Using Molecular Docking Study with Different Coronavirus Spike Protein and ACE2

Suitable Docking Protocol for the Design of Novel Coumarin Derivatives with Selective MAO-B Effects
Assalamu’alaikum Wr. Wb.
Alhamdulillahirabbil ‘alamin. After a long wait for almost 1 years from the first planned, finally the new scientific journal of the Department of Pharmacy Universitas Muhammadiyah Palangkaraya can be published. This scientific journal was named Journal of Molecular Docking (J Mol Docking), inspired by one of the most popular in silico methods in computer-aided drug design. Journal of Molecular Docking published every 6 months (2 issues/year) every June and December.

This edition contains five articles consisting of writings from four countries including Indonesia, India, Bulgaria, and Egypt. The authors come from several institutions, including Bio Search Research Institution, Sekolah Tinggi Farmasi Muhammadiyah Tangerang, Sri Ramachandra Institute of Higher Education and Research, Siddha Central Research Institute – Central Council for Research in Siddha, Chhattisgarh Swami Vivekanand Technical University, Universitas Mataram, and Medical University – Sofia.

Editorial boards are fully aware that there are still room for improvement in this edition, hence with all humility willing to accept constructive suggestions and feedback for improvements to the publication for the next editions. The editorial board would like to thank all editors and reviewers, and contributors of the scientific articles who have provided the repertoire in this issue. We hope that all parties, especially the contributors of the articles, could re-participate for the the publication in the next edition on December 2021.

Wassalamu’alaikum Wr. Wb.

Palangka Raya, June 2021

Editor-in-Chief
## Table of Contents

### JOURNAL OF MOLECULAR DOCKING

*J Mol Docking – ISSN: 2798-138X (online)*

**Volume 1 Issue 1 June 2021**

**Sections:** **ORIGINAL RESEARCH ARTICLES**

1. **Development of SARS-CoV-2 Inhibitors Using Molecular Docking Study with Different Coronavirus Spike Protein and ACE2**
   Israa Mohamed Shamkh / Bio Search Research Institution, Egypt
   Dina Pratiwi / Sekolah Tinggi Farmasi Muhammadiyah Tangerang, Indonesia
   1 – 14

2. **Molecular Docking Studies of Phytoconstituents Identified in Traditional Siddha Polyherbal Formulations Against Possible Targets of SARS-CoV-2**
   Logesh Kumar Selvaraj / Sri Ramachandra Institute of Higher Education and Research, India
   Geethanjali Thayumanavan / Sri Ramachandra Institute of Higher Education and Research, India
   Srikanth Jeyabalan / Sri Ramachandra Institute of Higher Education and Research, India
   Sugin Lal Jabaris / Siddha Central Research Institute, Central Council for Research in Siddha, India
   15 – 24

3. **A Comparative Study of Approved Drugs for SARS-CoV-2 by Molecular Docking**
   Achal Mishra / Chhattisgarh Swami Vivekanand Technical University, India
   Radhika Waghela / Chhattisgarh Swami Vivekanand Technical University, India
   25 – 31

4. **The Study of Potential Antiviral Compounds from Indonesian Medicinal Plants as Anti-COVID-19 with Molecular Docking Approach**
   Baiq Ressa Puspita Rizma / Universitas Mataram, Indonesia
   Agus Dwi Ananto / Universitas Mataram, Indonesia
   Anggit Listyacahyani Sunarwidhi / Universitas Mataram, Indonesia
   32 – 39

5. **Suitable Docking Protocol for the Design of Novel Coumarin Derivatives with Selective MAO-B Effects**
   Emilio Viktorov Mateev / Medical University – Sofia, Bulgaria
   Iva Valkova / Medical University – Sofia, Bulgaria
   Maya Georgieva / Medical University – Sofia, Bulgaria
   Alexander Zlatkov / Medical University – Sofia, Bulgaria
   40 – 47
Author Guidelines

JOURNAL OF MOLECULAR DOCKING

J Mol Docking – ISSN: 2798-138X (online)

1. Writing is the result of original research and literature review in the field of pharmacy, chemistry, bioinformatics, and others using Molecular Docking Simulation as its main analysis method which have never been published in other scientific publication media.

2. Manuscripts that have been published in the form of a preprint on several platforms such as arXiv, SSRN, and ResearchGate are welcome to publish.

3. The manuscript is written in English with Book Antiqua font 10 pt, two-column, density 1.15 spaces, on A4 paper with a top-down margin of 2.5 cm and right-left margins 1.5 cm.

4. The manuscript is typed with MS-Word program using the provided template and saved in .doc or .docx format.

5. The manuscript is typed strictly with the following rules:
   a. The title, short and clear, written in English. The title length does not exceed 20 words.
   b. Authors, listed without mention of title or degree, under the name including the affiliation and complete address, and email of the corresponding author. The author's name, which consists of one word, must be repeated twice for first and last names. To author with names of more than two words, the author's last name consists of only one word, the rest is written as the first name.
   c. Abstract, written in English which is a summary of the article. The abstract is created in one paragraph and a maximum of 250 words with Book Antiqua font 9 pt, single column, and space 1. Points that must be listed in the abstract include the research objectives, methods, results, conclusions, and keywords. The number of keywords is between three and five keywords.
   d. Introduction, contain background, reasons for the importance of underlying research or hypotheses, general approaches and objectives of the research and relevant literature review. The number of paragraphs not restricted but the contents must include background, objectives, positions on previous research, as well as the novelty of the research. The little theoretical basis which indirectly related to the contents of the article could be included without sub-chapters required. Citation is written in the form of the last name followed by the year of publication. If the author numbered two people, the last names of the two writers were written separated by the ' & '. Citation of more than one author written in 'et al'.
   e. Methodology, Research method consists of 2 sub-chapters including materials and methods. If data analysis is specific, or the way of analysis is novel, then data analysis subchapter could be added. The sub-chapters are written without numbering or bullet.
   f. Results and Discussion, at least contain three subjects (1) description of results, (2) interpretation or explanation of results, and (3) comparative of results with previous studies results. If the sub-chapters very length could be made sub-sub-chapters with Arabic numbering. Description of the results can be in the form of tables and figures with a serial number (Table uses a sequence of Roman numerals and placed at the top, while figures using Arabic numeric sequence and placed in the below).
   g. Conclusion, made in a single paragraph without the citation contains the final conclusion and suggestions for advanced research.
   h. References, a list of recently selected topics is published last five years (minimum 75% of at least 10 references). The bibliography is written in appearance order chronologically with the serial number (Vancouver System) and suggested using a reference management application such as EndNote, Mendeley, Zotero, and other applications.

6. Authors whose manuscripts are published are free of charge for both Publication cost and article processing charge.

7. Authors will get full access to the article published on e-journal of UM Palangkaraya at the website http://journal.umpalangkaraya.ac.id/index.php/jmd.
